

NORMAN®

Endpoint Protection v9

What's new

Norman Endpoint Protection

Norman Endpoint Protection comes with the industry-leading Norman SandBox® and DNA Matching technologies. These award-winning, proactive security technologies protect against new and unknown malware and other persistent threats, keeping endpoints safe at the lowest possible cost. Norman Endpoint Protection stops all kinds of malware threats including viruses, worms, trojans, spyware, adware, bots, zero-day threats and rootkits.

Norman Endpoint Protection delivers cost effective, easy-to-administer threat protection for small and medium businesses and scales, using a new multilevel architecture, to serve even the largest, most complex enterprise networks. Security policies may be set and managed centrally across multiple sites ensuring rapid security updates and effective local control.

The latest version of Norman Endpoint Protection delivers the most sophisticated IT protection available. Its advanced architecture makes it extremely easy for the IT administrator to manage any size network, while delivering a lower cost of ownership experience.

Release highlights include:

- » Multilevel architecture
- » Endpoint Manager GUI improves usability
- » "Silent clients" – suppress client popup's
- » Clients improved
- » More Clients supported (Windows Core Server, Linux, Lotus Domino)
- » New, faster AV scanners including "reverse action cleaning"
- » Support for "Potentially Unwanted Applications" (Windows only)
- » New real time protection module Intrusion Guard (Windows only)
- » Windows 8 ready
