

**NORMAN®**  
**MalwareAnalyzerG2**

Powered by Norman SandBox®

**Norman Malware Analyzer G2 automates and simplifies malware research, reducing manpower, time and costs.**

The Next Generation from the Inventors of SandBox® and Malware Analyzer

Using hybrid sandboxing, the dynamic analysis capabilities of the Malware Analyzer products are unmatched by any other product.

**Features**

- » **G2 Analysis Framework** - Integrating intelligence weapons of tomorrow
- » **Norman IntelliVM** - Embeds Norman's proprietary KernelScout technology deep in the environment to discover malicious behavior
- » **Norman SandBox®** - Enhanced for Analyzer G2, Norman's fully emulated SandBox has been a proven weapon against cyber threats throughout Norman's customer community
- » **Analysis Desktop** - Web Based management & operations console
- » **Appliance Version & APIs** - The speed and efficiency of G2, where and when you want it
- » **Full Support for Web and File Format Threats**

**Benefits**

- » **Superior Detection** - Hybrid SandBoxing produces intelligence unmatched by any other solution
- » **Web-Based Analysis Desktop** management dashboard console. Users can search the malware intelligence and collection database, storing samples, reports, and events
- » **Flexible Pricing for High ROI** - Don't overpay excess capacity. Add capacity as you needs change and let G2 free your valuable assets for other important tasks
- » **Scalable Architecture** - Process hundreds of thousands of files per day with parallel sample processing
- » **Ease of Integration** - Available as a hardware appliance or software. Plug and play out of the box, or integrate with customized analysis systems and honeypots with G2 APIs
- » **Ease of Use** - Drill-down to effortlessly generate the intelligence of a seasoned reverser for more advanced risk assessment
- » **Flexible Reporting** - Customizable intelligence reports with real-time incident alerting

**DELIVERING INDUSTRY-LEADING PRODUCTIVITY**

Norman's technology was voted "Most Innovative Idea in the Past 10 Years" by security researchers at the VB2010 Conference. Trusted as the leading expert for investigating and protecting against cyber threats by global organizations since the first days of malicious software, Norman has again revolutionized and simplified malware analysis with the introduction of the Malware Analyzer G2 framework to the Malware Analyzers product portfolio.

Norman ASA is a world leading company within the field of data security, internet protection and analysis tools. Through its SandBox technology Norman offers a unique and proactive protection unlike any other competitor. While focusing on its proactive antivirus technology, the company has formed alliances which enable Norman to offer a complete range of data security services.

Norman was established in 1984 and is headquartered in Norway with continental Europe, UK and US as its main markets.
